Java Backend & Full Stack Developer | Microservices | Healthcare | Banking | Retail

Professional Summary

Java Developer with 6+ years of experience delivering enterprise-grade solutions across Healthcare, Banking, Retail, and Pharmaceutical domains. Skilled in building backend microservices with Spring Boot, Kafka, and Kubernetes, integrating cloud platforms (AWS, Azure, GCP), and ensuring performance, scalability, and compliance (HIPAA). Experienced as both Backend and Full Stack Developer, with frontend expertise in React and Angular. Proficient in databases (MySQL, MongoDB, PostgreSQL, Oracle) and event-driven architectures.

In Healthcare and Pharmaceutical, developed HIPAA-compliant applications and secure data workflows. In Banking, built high-performance payment and transaction processing systems. In Retail, contributed to scalable pharmacy and customer-facing applications. Strong track record of enhancing performance, scalability, and user experience across multiple industries.

Recently completed a Master's in Computer Science (June 2025) at Maharishi International University, with projects in online banking, car reservation systems, and large-scale data processing. Passionate about cloud-native architectures, event-driven systems, and secure, high-performance applications.

Core Technical Skills

- Languages & Frameworks: Java, Spring Boot, Spring Cloud, Hibernate, JPA, React, Angular, Bootstrap
- Cloud Platforms: AWS (EC2, RDS, S3, CloudWatch, IAM, SNS, SQS), Azure (Cosmos DB, Azure DevOps, MySQL), GCP
- Databases: MongoDB, MySQL, PostgreSQL, Oracle, Azure Cosmos DB
- Messaging & Streaming: Apache Kafka, RabbitMQ, ActiveMQ
- DevOps & CI/CD: Jenkins, Docker, Kubernetes (GKE, AKS, OpenShift), Terraform, Azure DevOps
- Version Control: GitHub, GitLab, Bitbucket
- Monitoring & Tools: Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), Grafana, Dynatrace, JMeter
- Methodologies: Agile/Scrum, Test-Driven Development (JUnit, Mockito, Spock)

Professional Experience

Publicis Sapient – United States

Java Backend Developer (Pharmaceutical Domain) | Apr 2025 – Present

- Developed and deployed Spring Boot microservices to support pharmaceutical workflows including drug inventory, prescription management, and compliance systems.
- Designed RESTful APIs to enable secure data sharing across patient, billing, and compliance systems.
- Leveraged Azure DevOps pipelines for CI/CD, automating build and deployment processes.
- Enhanced observability with Azure services, Splunk, and ELK stack for monitoring and troubleshooting.
- Implemented Spring Security for HIPAA-compliant data protection.
- Collaborated with cross-functional teams to deliver scalable backend solutions for pharmaceutical operations.

JP Morgan Chase – Chicago, IL

Java Backend Developer (Payment Domain) | Jun 2024 – Feb 2025

- Developed and optimized Java-based payment processing systems ensuring high availability and scalability.
- Architected and deployed Microservices using Spring Boot, Spring Cloud, and Kubernetes (GKE) to handle millions of transactions daily.
- Integrated MatchPro Transaction Processor Service enabling accurate invoice-to-payment reconciliation through Perfect Match and FindRule technologies.
- Implemented real-time messaging and event-driven processing using Apache Kafka, ensuring low-latency, high-throughput financial data streaming.
- Enhanced monitoring and observability by integrating Splunk, ELK Stack, and Grafana for real-time log analysis and anomaly detection.
- Optimized database interactions using Hibernate, JPA, and MongoDB, significantly improving query performance.
- Automated CI/CD pipelines using Jenkins, Docker, and Terraform for deployments on AWS and GKE.
- Strengthened system security with OAuth2, JWT, and Spring Security.

Cognizant – Jersey City, NJ (Walgreens Domain)

Full Stack Developer | Aug 2022 – Mar 2024

- Developed Spring Boot microservices for prescription processing and patient data security.
- Built responsive UIs using React, HTML, CSS, Bootstrap, improving user experience.
- Integrated Kafka for real-time streaming between pharmacy systems.

- Managed CI/CD with Jenkins on Kubernetes, ensuring faster release cycles.
- Optimized backend queries using Hibernate & MongoDB, ensuring high data integrity.
- Collaborated in Agile teams, providing mentorship and technical guidance.

Liya Enterprise – Asmara, Eritrea

Full Stack Developer (Banking Domain) | Dec 2019 – Sept 2021

- Designed and implemented payment and banking applications for Commercial Bank of Eritrea.
- Developed backend workflows using Spring Boot, JPA, Hibernate, and Kafka.
- Built CI/CD pipelines with Jenkins, Docker, Kubernetes, reducing manual deployments.
- Applied Apache Spark for batch and real-time financial data processing.
- Built responsive UIs with React, HTML, CSS to enhance client-facing applications.
- Developed REST APIs for seamless banking integrations.

Bisha Mining – Asmara, Eritrea

Full-Stack Software Developer | Jul 2017 – Oct 2019

- Developed HR, Payroll, and Supply Chain applications using Spring Boot & React.
- Enhanced system security via penetration testing and ethical hacking.
- Contributed to all phases of SDLC while maintaining high availability of systems.

Education

Master of Science in Computer Science – Maharishi International University, USA
(Graduated June 2025)

Bachelor of Science in Computer Science – Eritrean Institute of Technology, Eritrea (2014)

Certifications

AWS Cloud Practitioner

Academic Projects (MIU)

- Online Banking System – Designed with Microservices architecture, React frontend, Spring Boot backend. Implemented JWT authentication, Kafka for streaming, and hosted on Google Cloud Platform (GCP).
- Car Reservation System – Built scalable microservices-based system with Angular frontend, Spring Boot backend, JWT authentication, Kafka integration, and MySQL/MongoDB databases on GCP.
- Library Management System – Desktop + web app with Spring Boot, React, MongoDB, and role-based access controls. Deployed monitoring with ELK stack.

- Online Shopping Cart – Developed with Angular and Spring Boot, integrated with banking APIs for payments. Used Hibernate and MySQL for persistence.
